

Training on PICSA Approach and Implementation of PICSA in the Target Villages of Africa RISING in the District of Bougouni Mali

From May 04th 2017 to May 10th 2017 was held in the conference of Bougouni Hydraulic Service. The training focused on the participative integration of climate services in Agriculture was organized by ICRISAT through Africa RISING program and facilitated by CCAFS, ICRAF, Mali Meteo in addition to ICRISAT. The training gathered the 6 technicians of the consortium implementing the project in Bougouni and state extension workers from agriculture, animal husbandry, forestry, meteo, farmers' organisations and representatives of the coordination of local NGO's. During 5 days the participants were familiarized with the participative tools (resource map, seasonal calendar). Participants were trained on the use and interpretation of climate data in excel sheet, the calculation of probability for rainy season onset at different period.

The 4th day of the training was consecrated to the practice on field of the tools presented during the sessions. Participants and facilitators went to Flola village where during a whole day they to practice the skills acquired during the training. The 5th day after the briefing of the field day, each participants to the training received a certificate delivered by ICRISAT.

IMPLEMENTATION OF PICSA TRAINING IN AFRICA RISING TARGET VILLAGES

The implementation of PICSA approach in the target villages of Africa RISING (Dieba, Flola, Madina and Sibirila) started on Thursday 11th May 2017. The implementation was done in each village by a team of two facilitators per village. Two consultant were recruited to support the technicians of Africa RISING during the implementation phase. The technicians' and the consultant conducted a step by step approach during sessions with women and men farmers during which they explain concisely the tools and provide guidance to individual during. After each training they fill the report sheet and farmer assessment sheet.

As the seasonal previsions are not available yet, these step were not implemented but farmers' were informed that these sessions will be hold later as soon as the team get the previsions from CCAFS and Mali Meteo team.

Implementation of PICSA in Flola (left) and Sibirila (right)

Implementation of PICSA in Dieba (left) and Madina (right)

The process in the villages last 8 days due to strong winds and storms that occurred in the target villages

Output:
